

**POSITION TITLE:** Training & Safety Specialist

**DEPARTMENT / SECTION:** Training & Safety

**REPORTS TO:** Director, Training & Safety

**SUPERVISORY RESPONSIBILITIES:** None

**POSITION SUMMARY:** Delivers thought provoking safety meetings that are educational and that raise the level of safety awareness of the ECG members. These programs should provide timely, up-to-date information regarding safety and technical procedures as applied to electrical distribution systems in Florida. Responsibilities' also include recommendations relative to safe, efficient and effective work practices and operations.

The primary objective associated with this position is to minimize the potential for job related accidents resulting in injuries and/or death through the process of teaching proper job related methods and procedures while raising safety consciousness throughout ECG members. The ultimate goal is a proficient worker. This job function is a value added service that contributes to improved competitive advantage through the enhancement of technical skills, abilities and knowledge of industry standard safe work practices.

This position will be located in Florida and requires frequent travel. 90% travel with up to 50% overnight travel.

**POSITION RESPONSIBILITIES:**

1. Coordinates with assigned ECG members to schedule and conduct regular safety meetings.
2. Actively participate in the Lineman Apprenticeship Program through preparations and instruction. Trainings are based on the electric distribution system.
3. Conducts Pole-top & bucket rescue for assigned members.
4. Assist with Mutual Aid events such as: Tornados, Ice Storms, and Hurricanes.

5. Be aware of electrical utility standards and regulations such as NESC, ANSI, OSHA, APPA Safety Manual.
6. Works closely with ECG member employees that are assigned the full or part time duties of safety and loss control coordinator, facilitator, manager, administrator etc.
7. Analyzes needs relevant to safety practices and standards for individual members.
8. Conducts accident investigations.
9. Interfaces with other departments and sections to meet ECG's organizational goals and objectives.
10. Professionally represent ECG at all industry associated or sponsored ECG events and activities.
11. Undertakes other duties and responsibilities as assigned.

### **QUALIFICATIONS:**

This position generally requires an Associate's or Bachelor's degree in safety administration, safety engineering or related field with a minimum of one year related safety experience required. A minimum of ten years of progressive distribution line work experience is a necessity. Must have excellent climbing skills. A combination of education and demonstrated related work experience may be substituted for a degree.

Requires the ability to effectively communicate ideas to others and deal with a variety of individuals at all organizational levels. Must have effective oral and written communication skills. Must hold a current Commercial Driver's License (CDL).

Must be computer literate and possess knowledge and skills of Microsoft's products.

Position requires excellent customer focus skills, effective decision making, a high level of integrity, and the ability to be adaptable and to take initiative.

### **Disclaimer:**

The above statements are intended to describe the general nature and level of work being performed. They are not intended to be an exhaustive list of all responsibilities, duties, and skills required.
